

## Recon-ng 1

A screenshot of a Kali Linux desktop environment. The top panel shows various application icons. The main window is a terminal titled 'kali@kali: ~' with a menu bar (File, Actions, Edit, View, Help). The terminal displays the Recon-ng v5.1.2 interface. It shows a list of modules categorized by type (Recon, Disabled, Reporting, Import, Exploitation, Discovery). The user has entered the command 'modules', which lists installed interfaces. Then, they entered 'modules load hackertarget', followed by 'options set SOURCE', which sets the current context option to 'FTMO.COM'. Finally, they entered 'run', which displays a list of results for 'FTMO.COM', including country, host, IP address, latitude, longitude, notes, and region for two different entries.

```
[recon-ng v5.1.2, Tim Tomes (@lanmaster53)]

Trash
[84] Recon modules
[14] Disabled modules
[8] Reporting modules
[4] Import modules
[2] Exploitation modules
[2] Discovery modules

File System
[recon-ng][default] > modules
Interfaces with installed modules

Usage: modules <load|reload|search> [ ... ]

[recon-ng][default] > modules load hackertarget
[recon-ng][default][hackertarget] > options set SOURCE
Sets a current context option

Usage: options set <option> <value>

[recon-ng][default][hackertarget] > options set SOURCE FTMO.COM
SOURCE ⇒ FTMO.COM
[recon-ng][default][hackertarget] > run

FTMO.COM

# Maltego:

The screenshot displays the Maltego Community Edition 4.6.0 interface running on Kali Linux 2023. The main window shows a graph titled "New Graph (1)" with a central node "ftao.com" and several outgoing links to other entities like "Veridige", "LOUNSCLOUDPLARE.COM", "PARADESCLOUDPLARE.COM", "Procy, LLC", and "FTMO.COM". The left sidebar contains the "Entity Palette" with categories like "Domain", "Phrase", "Website", "DNS Name", "Cryptocurrency", and "Bitcoin". The bottom status bar indicates "115 entities (89 nodes), 135 links (108 edges)".

**Entity Palette**

- Recently Used
- Domain: An internet domain
- Phrase: Any text or part thereof
- Website: An internet website
- DNS Name: Domain Name System se
- Cryptocurrency
  - Bitcoin Cash Address: An address in a Bitcoin C
  - Bitcoin Cash Block: A generic block in a Bitco
  - BitcoinCash Block Height: The incremental block nu
  - BitcoinCash Transacti: A transaction in a Bitcoin
  - Bitcoin Address: An address in a Bitcoin b
  - Bitcoin Block: A generic block in a Bitco
  - Bitcoin Block Height: The incremental block nu
